

## Exhibit 1.2: Multiple Comparisons of Average Achievement

Because there often were relatively small differences in achievement between countries, Exhibit 1.2 shows whether the differences in average achievement among the countries are statistically significant. The top part of the exhibit shows the results for ePIRLS. Singapore was the top-performing country, followed by Norway and Ireland, which had higher achievement than all the other participating countries except Singapore. Sweden, Denmark, and the United States also performed very well on ePIRLS.

For comparison purposes, the bottom part of the exhibit shows the PIRLS comparisons for the ePIRLS participants. In this case, Singapore was the top-performing country, followed by Ireland, Norway, Chinese Taipei, and Sweden.

## **Exhibit 1.2: Multiple Comparisons of Average Achievement**

Note: Results based on students who participated in both PIRLS and ePIRLS.

Instructions: Read across the row for along the top of the chart. The sym significantly lower than that of the country, or if there is no statistically two countries.  • PIRLS Online Information	bols indica comparisor significant	te w n co t dif	het unti	her y, si	the igni	ave fica	rage ntly	ach high	niev ner t	eme than	nt c	of th	e co the	unt con	ry ir npa	risor		w is	racy Study – PIRLS 2016
